

State-of-the-art technology,
extreme performance,
and **INTELLIGENT** solutions
for today's **e-business**

Build your e-business with AS/400

e-business demands more than the ability to run just your core applications. As companies are being challenged by complex multi-workloads, IT professionals are embracing new e-business technologies to help their companies stay competitive. Speeding up the supply chain, analyzing data and responding quickly to customers' needs requires extending your core business applications to the Web and connecting your business to other businesses, customers, suppliers and employees.

That's why AS/400e™ servers are ideal in an e-business environment. Not only do they supply the power, reliability and security to handle all your mission-critical applications, but they also provide a complete set of tools that will help extend all aspects of your business to the Web.
